

Career Overview

I am an architectural visualiser and graphic designer with degrees in Digital Media and Architectural Studies. I have professional experience working in a large architectural design firm, as well as freelance design and independent projects. I am driven to learn and develop new creative skills and am currently seeking a new challenge in a creative industry.

Key Skills and Attributes

Software Proficiencies

I have used many computer programs over the course of my studies and am extremely proficient in Adobe Photoshop and SketchUp. I have training in Bentley Microstation for 2D CAD drafting and am also familiar with Adobe Illustrator, Adobe InDesign, Autodesk Revit, Autodesk Maya as well as the Microsoft Office Suite. I also have experience with several programming languages such as ActionScript, Lingo and HTML. Because of my use of a large variety of software packages I am able to learn and adapt to new software very quickly.

Technical Proficiencies

Through my studies I have used the Makerbot Replicator 2 3D printer as well as Universal ILS/VLS Laser Cutters to create physical components from digital files. I have also been inducted in the UNSW Design Workshop and trained in the use of bandsaws, disc and belt sanders, handsaws, angle grinders and drills. My technical skills with these machines is evidenced in my model making and hand-craft portfolio.

Communication

I have highly developed verbal and written communication skills. My verbal skills have developed through my involvement with the school debating team, university presentations and through my work in customer service. My written skills are evidenced in my high performance in university history and theory courses, and have also developed through my personal creative projects.

Creativity

Both the Digital Media and Architectural Studies degrees I have undertaken have had a heavy focus on creativity. I enjoy and relish the opportunity to use my creative skills, and in addition to my studies I have undertaken my own writing, design, animation and film projects.

Leadership

I have undertaken many leadership roles including captaining a number of sporting teams, managing a small not for profit shop and directing a number of short films. I also undertook leadership roles in high school as the Vice-Captain of my house, as well as Treasurer for the Scots Student Representative Council.

Teamwork

Through working with the Lend Lease Design team as well as in university group project I have shown the ability to work in a team towards a common goal. My involvement in school, college and local sporting groups has shown that I flourish in a team environment, and not only does my own performance lift, but I can lift the performance of those around me.

Education

Masters of Architecture – *University of New South Wales*

Digital Innovation in Architecture Nominee 2014

2012-2014

Bachelor of Architectural Studies – *University of New South Wales*

Lend Lease Student Placement Award 2010

Responsible Service of Alcohol (RSA)

2014

Responsible Conduct of Gambling (RCG)

2014

Work Cover White Card – *Construction Industry*

2011

Australian Red Cross Senior First Aid Certificate – *Workplace Level 2*

2009

Personal Interests

I enjoy creative pursuits in my personal life, from designing and playing board games to assembling and painting tabletop miniatures. I have played guitar since finishing school and enjoy the challenge of learning new music and pushing the limits of my skill. I play both summer and winter cricket for the Kingsford Apaches and enjoy the comradery of team sports as well as the refinement of a technical skill. I have been writing a young-adult fiction novel for the past few years and would like to one day see it published.
